

DirectVet

Digital X-ray for Every Veterinarian

DirectVet is an ergonomically designed digital X-ray system that runs on a standard wall outlet, and is powerful enough to replace a system that requires high voltage.

for Veterinary

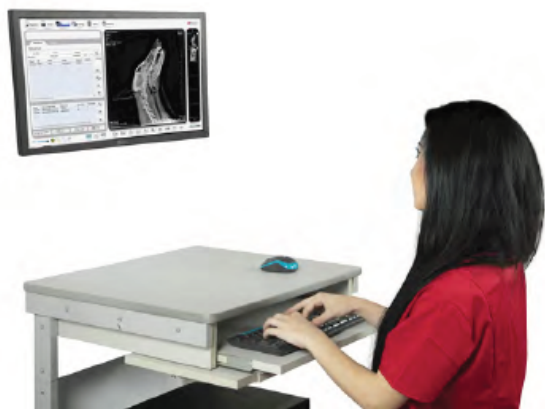

Radiography
System

Top-of-the-line imaging combined with great features including:

- 120kVp maximum output
- Send DICOM or JPEG Images to your existing practice management software
- Email Images to customer or colleagues for review
- User-friendly interface
- X-ray source and detector move together for perfect positioning
- Heavy duty table holds up to 300lbs

This system is ideal for existing practices looking to upgrade as well as new practices. In addition to being an easy, convenient fit for a range of spaces, this digital X-ray system allows you to hit the ground running without any special power supply modifications or construction.

Get phenomenal image quality and reliability with advantages such as:

- Cesium Iodide (CsI) detector technology generates quality images with high-precision for low-error diagnosis
- Enhanced image processing engine provides superior image quality
- Post-Image processing for each body part
- Imaging and annotation functions (magnification, rotation, cropping, etc.)
- Unmatched warranty program

DirectVet is truly a technological evolution, providing top-of-the-line image processing and advanced functionality. Additionally, this system provides veterinary practices with quick workflow, exceptional image acquisition and image quality, and the ability to send images to DICOM-compliant practice management software or central PACS for further analysis.
